### Dear EPA Region 10,

The Portland Harbor Superfund site needs an aggressive cleanup that protects people and wildlife for the long-term. In response to your Draft Plan, I feel you need to consider the following:

- 1 The overall goal of the Superfund cleanup should be to lift the fish advisory related to toxic pollutants found in the Portland Harbor area of the Willamette River.
- 2 At least 1000 acres of the most highly contaminated sediment should be dredged and removed to achieve this goal.
- 3 The Draft Plan contains far too much Monitored Natural Recovery.
- 4 More to say? Add it here: Let's put the effort in to do this right, this time, instead of waiting for some future date
